---

### EDUCATION

**Bachelors in Business and Information Technology.**

To graduate in 2024

Strathmore University, Nairobi.

The course was intensive with software engineering/ software development akin to Computer Science, intense in coding. For my final year software project I developed an android app to handle "clean water trucks" deliveries.

The main aim of the course is to understand business processes and learn to optimize business processes with software

- Learnt web development and web services.
- Learnt to develop mobile application development.
- Learnt to carry out networking with networking protocols.
- Specialized with business intelligence which is to do with Databases and handling data.

---

### PROFESSIONAL EXPERIENCE

**Erp Consultant**

September, 2022 – July, 2023

**Soft IQ**

- I helped integrate MS Dynamics and Odoo using enterprise Restful API's, Django and MS application programming languages showing adaptability/ flexibility to different technology and ability to solve complex problems.
- Helped present the product to the client and close the sale showing strong presentation skills and sales skills.
- I collaborated with my colleagues to both develop products and devops showing interpersonal skills and version control systems like GIT as well as strong troubleshooting software skills.

**Freelance full-stack web development**

January 2023–current

- I develop and publish websites for people for personal and business use with a high satisfaction rate while also giving them a more professional appearance and increasing efficiency for their business.
- Maintain good practice of web standards and reliability.
- Self-motivated and self starting as well as good time management skills
